Exercise 10.1

For the following molecules, determine the point group and the symmetry of the MOs for the π-electrons, and, using Hückel theory, obtain the MOs and orbital energies:

(a) *trans*-1,3-butadiene,

(b) ethylene,

(c) cyclobutadiene,

(d) cyclopentadienyl radical C_5H_5,

(e) naphthalene,

(f) phenanthrene.

Solution 10.1

I will solve these issues with Hückel theory.

(a) 111111111111111
